Casper Hildebrand

Full-Stack & Distributed Systems Engineer

Amsterdam, Netherlands | casperhildebrand@gmail.com | cashil.github.io | github.com/cashil | linkedin.com/in/casper-hildebrand

Profile

Double Master's graduate from Delft University of Technology (Computer Science & Science Education). Full-stack engineer at Tikkie (ABN AMRO) building resilient, high-throughput merchant payment rails handling millions of Dutch transactions. Deep expertise across TypeScript, React, Node.js, AWS cloud architecture, and data analytics.

Experience

Tikkie (ABN AMRO) — Amsterdam, NL
Full Stack Software Engineer (Fintech Production Rails) — Mar 2026 – Present

- Engineered merchant payment infrastructure powering thousands of Dutch enterprises and millions of real-time transactions for Tikkie Business.
- Designed fault-tolerant payment settlement workflows, idempotent partner APIs, and resilient transactional pipelines.
- Built modern, accessible merchant dashboards and telemetry reporting using React, TypeScript, Node.js, and AWS serverless infrastructure.

Harvest — Amsterdam, NL
Software Engineer – Young Talent Fellowship — Feb 2026 – Present

- Selected for intensive elite engineering fellowship parallel to production at Tikkie.
- Conducted advanced labs on distributed systems architecture, event-driven design, and resilience engineering under failure conditions.

Bitsized — Delft, NL
Platform Co-Founder & Lead Engineer — Jan 2023 – Feb 2025

- Co-founded and engineered an interactive educational coding platform adopted by Dutch secondary school computer science departments.
- Architected in-browser code execution sandboxes, real-time evaluation feedback, and teacher assignment management tooling.

CSG De Lage Waard & Stanislascollege — South Holland, NL
Computer Science Teacher & Department Lead — Aug 2024 – Jul 2025

- Directed the CS department across 10 cohorts (∼200 students); designed national graduation exam standards and capstone evaluation frameworks.
- Instructed students in computer architecture, digital logic, algorithms, and web application foundations.

Netcompany — Delft, NL
Software Analyst & IT Consultant — Sep 2021 – Jun 2022

- Re-architected data migration workflows and technical specifications for national Dutch public sector enterprise systems (Vervangingsfonds & Participatiefonds).
- Built full-stack commercial property energy modeling tools according to statutory governmental regulations.

Bexter — Delft, NL
Software Developer (Backend & Frontend) — Sep 2019 – May 2021

- Engineered backend services and modernized responsive web portals for TrackOnline, an enterprise asset logistics platform.

Education & Research

Delft University of Technology (TU Delft) — Delft, NL
MSc Computer Science (Data Science Specialization) — Sep 2021 – May 2024

- **Master's Thesis:** *Debugging the Divide: Exploring Men's and Women's Motivations and Engagement in Computer Science MOOCs.* Analyzed clickstream telemetry across 174,988 learners and 14 course runs using k-means clustering and statistical regression.
- Coursework: Distributed Algorithms, Machine Learning, Large-scale Data Analytics, Cloud Computing.

Delft University of Technology (TU Delft) — Delft, NL
MSc Science Education & Communication — Sep 2021 – May 2024

- Awarded formal Dutch first-degree teaching qualification (Eerste Graads) in Computer Science.
- Coursework: Instructional System Design, Educational Psychology, Curriculum Engineering.

KTH Royal Institute of Technology — Stockholm, Sweden
Exchange Studies in Computer Science & Machine Learning — Aug 2022 – Jan 2023

- Focused on advanced machine learning algorithms, information visualization, and human-computer interaction.

Delft University of Technology (TU Delft) — Delft, NL
BSc Computer Science & Engineering — Sep 2017 – Jul 2021

- Foundations: Algorithms, Operating Systems, Networking, Databases, Software Engineering. BSc Board of Studies Member.

Technical Competencies

Languages:	TypeScript, JavaScript, Python, C#, Java, SQL, HTML/CSS, Shell
Frontend:	React, Next.js, Vite, Tailwind CSS, Web Components, State Management, Accessibility (a11y)
Backend & Cloud:	Node.js, Express, AWS (Lambda, S3, RDS, CloudFront), PostgreSQL, MySQL, REST APIs, Microservices
Data & Systems:	k-Means Clustering, Pandas, Telemetry & Clickstream Analytics, Distributed Systems, Event-Driven
Practices:	CI/CD Pipelines, Test-Driven Development (Vitest, Jest), Git, Agile/Scrum, Technical Writing
